1. CONTROL UNITS

- 2 addressable units, supporting 50 or 250 points
- 2 conventional units, supporting four or eight zones
- Features LED or LCD displays
- Easy, app-based programming
- Connects to central station via IP LAN, IP cellular or POTS

2. SENSORS

- Both addressable and conventional devices, including photo, heat, CO, multisensor, duct and more
- Offer advanced protection for a broad range of applications and environments
- Smart technology reduces nuisance alarms
- UL268 7th Edition listed

3. NOTIFICATION APPLIANCES

- A full line of notification appliances to suit virtually any application

4. ANNUNCIATORS

- Comes in both LCD and LED versions
- Delivers local annunciation of alarms and events to building managers and first responders

5. INITIATING DEVICES AND MODULES

- Manual initiation and signaling of an emergency
- Modules allow other devices, like sprinklers and security systems, to be monitored by the fire alarm system

6. STREAMLINED INSTALLATION

- Online video tutorials for technicians make training fast and easily accessible
- Addressable control units can be programmed via smart phone with the mobile app
- QR codes on sensors allow installers to read, program and upload device info wirelessly to addressable control units

FASTER TURNAROUNDS, EASIER INSTALLATIONS FOR SMALLER PROJECTS.

When it comes to fire and life safety for smaller projects, you shouldn't have to compromise on innovation or convenience. With the Autocall Foundation Series, you don't have to. Foundation Series products are quick and easy to install, offering building owners big building benefits in a much smaller package.

Find out all the reasons the Autocall Foundation Series is ideal for your projects. **VISIT AUTOCALL.COM OR CALL YOUR LOCAL AUTOCALL REPRESENTATIVE.**
