Your business depends on protection that's comprehensive and easy to manage. We help commercial businesses of all kinds – from strip malls to high rises – protect employees, customers, assets and property from fire.

COMMERCIAL

Campuses are among the most complex and demanding environments for fire protection systems. Autocall solutions help you keep students, faculty and staff safe around the clock – while minimizing disruption and management.

EDUCATION

Transportation facilities – from airports and rail stations to trucking and shipping terminals – are busy, high-risk work environments. You need industrial-grade fire detection solutions that bring order and help ensure the health and safety of travelers and employees while protecting physical property and assets.

TRANSPORTATION

Stores and shopping malls

need to respond swiftly and surely in a fire emergency – guiding customers and employees to safety, protecting inventory, and helping firefighters work effectively. Autocall solutions can help keep your retail environment safe.

RETAIL

Your business thrives when guests are relaxed, comfortable and free to enjoy your services. We can help you maintain that atmosphere by delivering optimal fire detection that's easy to manage and non-disruptive to guests.

HOSPITALITY

We understand the needs of industrial organizations, including those handling hazardous or flammable materials. We offer all the components to deliver a comprehensive, customized solution that maximizes the safety of your high-risk industrial environment.

INDUSTRIAL, PETROLEUM, OIL AND GAS

THE SMART CHOICE, NO MATTER WHAT YOUR ROLE

When it comes to fire detection systems, no choice is more important than your fire alarm control units. They are the nerve center of any fire detection system, critical not only for their ability to help save lives, but also to deliver value over time. With the right choice, you'll have a fire detection system that makes everyone's job easier and can be expanded and enhanced over time to accommodate changing needs.

For many facilities, the right choice is Autocall. Autocall control units are engineered to deliver industry-leading scalability, reliability and long-term value. They support a broad range of industry, customer and facility requirements, enabling you to get a comprehensive, tailored fire detection solution for every installation. And Autocall control units offer innovative features that can make them easier to install, manage and maintain.

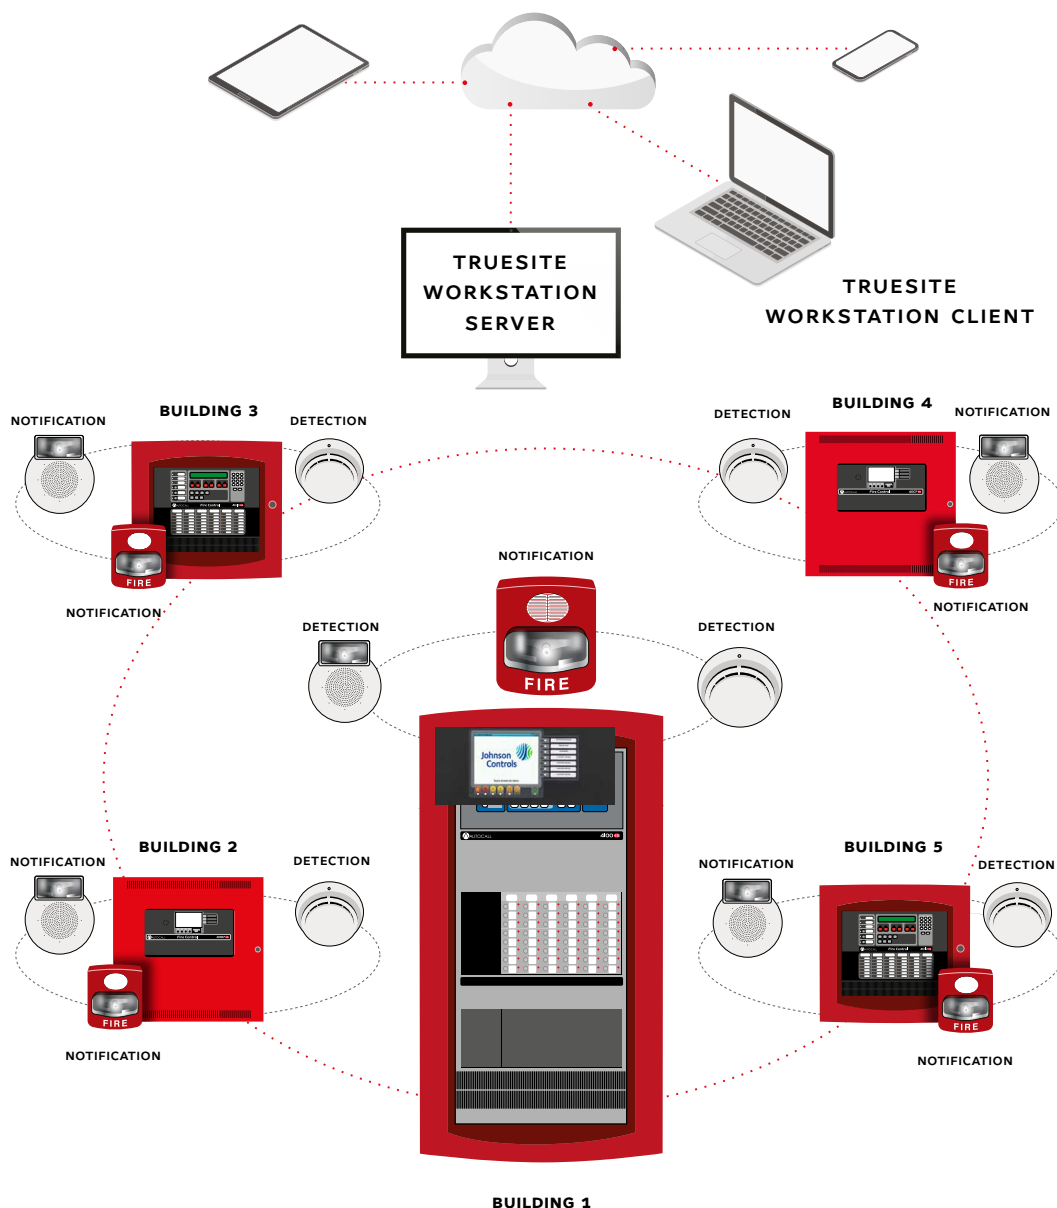

CONTROL UNITS

THE INTELLIGENCE BEHIND THE MOST
INNOVATIVE FIRE DETECTION SYSTEMS

CONTROL UNITS AND WORKSTATIONS TO SUIT EVERY FACILITY

Control units form the heart of Autocall fire detection systems, supporting individual supervision and control of detection and notification devices across facilities. They also enable operator access and management via network workstations, cloud-based web browser or mobile devices.

For illustrative purposes only. Does not depict actual system configuration.

CONTROL UNITS THAT NEVER COMPROMISE

Decades of innovation and experience are packed into every Autocall control unit, delivering advanced features and technologies that add up to superior value and lower total cost of ownership.

ADDRESSABILITY

Many Autocall control units, detection products and notification appliances are addressable, intelligent devices. Addressability allows T-tapping and more efficient wire runs, which can lower installation and overall project costs. Addressability also means each device is individually supervised for malfunction or failure, and you can tailor the settings for each device from the control unit.

MODULAR DESIGN

Autocall control units are based on a modular architecture that allows them to be custom-configured to each facility's specifications and capacity requirements. In addition, Autocall 4100ES control units are custom built, so they arrive assembled and ready to connect.

INTUITIVE INTERFACE

Whether you're working with your Autocall system via an intuitive touchscreen display, the PC-based TrueSite Workstation command center, or the TrueSite Mobile Client app, it's easy to access information, view reports and perform a variety of operations.

INTEGRATION WITH BUILDING SYSTEMS

You can integrate Autocall control units with building management systems and security systems to share information and help centralize facility control. With support for popular communication protocols such as BACnet and Modbus, Autocall enables you to mount a coordinated response to a fire emergency, linking the fire detection system with elevators, door holders, smoke dampers, air pressurization systems and more.

FUTURE-PROOFING/UPGRADEABILITY

Autocall systems are engineered to provide a migration path to future technologies and features, making upgrades and expansions fast and easy.

REGULATORY COMPLIANCE

You can be confident that Autocall control units comply with industry and jurisdictional codes.

THE AUTOCALL 4100ES

Big power for the most
complex jobs

4100ES FIRE CONTROL UNIT

4100ES Addressable Fire Detection and Control Basic Panel Modules and Accessories

The fully networkable 4100ES supports up to 3,000 points and is designed to handle the complex requirements of medium/large facilities and multi-building campus networks. It features addressable technology, scalable design flexibility, voice notification/audio capability and is listed for multi-hazard suppression release control. An optional touchscreen display includes an intuitive interface that provides a wealth of information.

PANEL-MOUNTED ANNUNCIATION MODULES

with 4100ES Fire Alarm Control Units, Remote Annunciators, and Network Display Units (NDU)

4100ES fire alarm units support a variety of switch input and LED status indicators to complement the information and controls available at the operator interface.

These modules provide a convenient interface efficiently packaged onto the front panel space of the cabinet bay. Additionally, the panel-mounted printer can conveniently record system status without requiring a separately located printer.

PRODUCT	PART NUMBER	DESCRIPTION
LED/Switch Modules, General Purpose	A100-1280	LED/Switch Module - Red (1 LED/Switch)
	A100-1281	LED/Switch Module - Yellow (1 LED/Switch)
	A100-1282	LED/Switch Module - Red on top, Yellow on bottom (2 LED/Switch)
	A100-1283	LED/Switch Module - Yellow on top and bottom (2 LED/Switch)
	A100-1284	LED/Switch Module - Red on top, Green on bottom (2 LED/Switch)
	A100-1296	LED/Switch Module - Green on top, Yellow on bottom (2 LED/Switch)
	A100-1285	LED/Switch Module - Red (1 LED/Switch)
	A100-1278	LED/Switch Module - 8 Red on left, 8 Yellow on right (1 LED/Switch)
	A100-1300	LED/Switch Module - With pluggable LEDs; shipped Red on top, Yellow on bottom (1 LED/Switch), UL, ULC, and CSFM listed only
	A100-1287	LED/Switch Module - Red (1 LED/Switch)
LED Only Modules and LED Kits	A100-1276	LED Only Module - Eight (8) LED Module with Red LEDs; custom label area per module and per LED
	A100-1277	LED Only Module - Sixteen (16) LED Module; Red LED on top and Yellow LED on bottom at each position; custom label area per module and per LED pair
	4100-9843	LED Kit - Yellow Kit of 8 LEDs
	4100-9844	LED Kit - Green Kit of 8 LEDs
	4100-9845	LED Kit - Red Kit of 8 LEDs
	4100-9855	LED Kit - Blue Kit of 8 LEDs
LED/Switch Modules with Green/Red/Green LEDs	A100-1286	LED/Switch Module - Eight function HOA (On, Off, Auto) Control Module with labeled switches; custom label area per module and per LED/switch set
LED/Switch Modules with Green/Red/White LEDs for IBC Applications	A100-1275	LED/Switch Module - Eight function HOA (On, Off, Auto) Control Module with labeled switches; LED colors meet International Building Code (IBC) requirements; custom label area per module and per LED/switch set
LED/Switch Modules with Green/Yellow/Green LEDs (UL, ULC, and CSFM listed only)	A100-1302	LED/Switch Module - Eight function HOA (On, Off, Auto) Control Module with labeled switches; for applications requiring no red LEDs; custom label area per module and per LED/switch set
	A100-1301	LED/Switch Module - Eight function HOA (On, Off, Auto) Control Module, same as 4100-1302 except switches are unlabeled
LED/Switch Controller Modules and Accessories	A100-1288	64 LED/64 Switch Controller Module with mounting plate
	A100-1289	64 LED/64 Switch Controller Module without mounting plate
	A100-0636	Harness Kit, Power and Communications
	A100-0641	Harness Kit, 26 Position Flex Cable, 14-1/2" (368 mm) long
	A100-1290	24 Point I/O Module for external connections
	A100-1294	LED/Switch Module Slide-in Labels
	A100-1279	Single blank 2" display cover
Panel-Mounted Printer	A100-1293	Panel Mount Thermal Printhead Printer, supplied with one roll of paper
	4190-9803	Replacement Paper for 4100-1293 Printer, one roll

SYSTEM ACCESSORIES

4100 Series Graphic Annunciator Modules; LED/Switch and 24 Point I/O Graphic Modules

These remote annunciator graphic control modules complement 4007ES, 4010ES and 4100ES (and other installed legacy panels) by providing LED/lamp/relay drivers and switch inputs to allow custom graphic displays to be designed for specific facility requirements, such as for smoke control (UUKL) systems. Wiring is minimized by Signaling Line Circuit (SLC) communications that also provides supervision. In the event of communications loss, an alert will be displayed at the fire alarm control unit and can also be identified at the remote annunciator if desired.

EMERGENCY VOICE/ALARM COMMUNICATIONS

WITH ES TOUCHSCREEN DISPLAY EQUIPMENT

4100ES Audio Systems provide voice communication, alarm tones, and/or digitally prerecorded voice messages to alert occupants of fire or other emergency situations. Evacuation signaling may be automatically generated via alarm initiated event programs or by firefighting personnel using the operator controls.

SYSTEM ACCESSORIES

Battery Brackets

For geographic regions where earthquake activity is a building design criteria, these battery brackets will hold the system batteries securely in place.

Datasheet: AC2081-0019

PRODUCT	PART NUMBER	DESCRIPTION
Battery Brackets	A2081-9402	Battery Bracket for 12.7 Ah Compatible Batteries
	A2081-9297	Battery Bracket for 33 Ah Compatible Batteries
Additional Battery Equipment	A100-0650	Battery Shelf

MASTER CLOCK INTERFACE

Dual RS-232 port module with port B dedicated for master clock/master time interface. RS-232 port A is available for connection to printers, terminals, or other compatible peripherals.

Datasheet: AC4100-0033

PRODUCT	PART NUMBER	DESCRIPTION
Master Clock/Master Time Interface	A100-9816	Dual Port RS-232 Module

4100ES MINIPLEX TRANSPONDERS

4100ES MINIPLEX transponders connect to a host 4100ES Fire Alarm Control Unit using remote unit interface (RUI) communications. At the transponder, RUI communications are received by the transponder interface module and translated into the same internal communications format that is used in the host control unit.

Datasheet: AC4100-1035

PRODUCT	PART NUMBER	DESCRIPTION
Transponder Type	A100-9600	Basic Transponder, includes bay equipment with power distribution interface, and 4100-0620 Basic Transponder Interface Module mounted in Block A
	A100-9601	Local Mode Transponder, includes bay equipment with power distribution interface, and 4100-0625 Local Mode Transponder Interface Module mounted in Block A

CABINET

Boxes, Doors, Dress Panels, Rack Mounting, and Accessories

4100ES Boxes are available sized for one, two, or three equipment bays, each with a battery bay located at the bottom. Colors include platinum or red. Doors are glass front with modular dress panels, or solid. Models are available with box and door combined for single package shipping, or packaged separately. Enclosures are NEMA 1 rated; wall-mount enclosures are also IP30 rated.

REMOTE ANNUNCIATOR PANELS

Remote Annunciator Panels are dedicated-purpose transponders that support fire alarm system status information. Typical use is when the host fire alarm control unit is located away from the area where those responding to a fire situation need status information.

NETWORK SYSTEM INTEGRATOR (NSI)

The Network System Integrator provides a gateway between any building control unit into the ES Net fire alarm network. This allows information from other building control units that are not equipped for direct network communications to be annunciated on the fire alarm network.

Datasheet: AC4190-0026

NETWORK ANNUNCIATOR PANELS FOR ES NETWORK (ES NET)

The 4100ES NDU with Voice Command Center (VCC) for ES Net is a network-level annunciator and manual system/point controller with optional network voice control equipment. It provides alphanumeric annunciation for up to 12,000 network points and/or point lists and can be programmed to function as the network master controller for Alarm Silence, Trouble Acknowledge, and System Reset.

SYSTEM ACCESSORIES

Serial Digital Alarm Communicating Transmitters (SDACT)

Serial digital alarm communicating transmitter (SDACT) modules monitor the status of the host fire alarm control unit and its connections to the Central Station monitoring location. When status changes require information to be reported, the SDACT provides detailed messages that can assist the Central Station in accurately implementing the required response. Typical information reports include alarms, troubles, and supervisory conditions. Model series 4007ES, 4010ES, and 4100ES provide specific point information. SDACT modules directly communicates with the fire alarm control unit CPU and are custom programmed for the specific requirements of the Central Station and the connected fire alarm control unit.

SYSTEM ACCESSORIES

Remote Control Unit

A602 Series SCU (Status Command Units) and RCU (Remote Command Units)

Status Command Units (SCU) provide 16 red zone status LEDs.

Multiples may be mounted together for additional zone coverage.

Remote Command Units (RCU) provide eight red zone status LEDs, and control switches duplicating the switch functions of the host Fire Alarm Control Unit.

A keyswitch enables the control switches. A green LED indicates power is present and a yellow LED indicates trouble.

	2081-9274	10 Ah, Battery, 12V DC
	2081-9275	18 Ah, Battery, 12V DC
External Accessories	A4090-9105	Class B operation, IDNet Fiber Optic Transmitter
	A4090-9107	Class X operation, IDNet Fiber Optic Transmitter
	A009-9801	External battery cabinet for up to 18 Ah batteries, beige
	A4081 series	End-of-Line resistor harnesses

4009 IDNAC REPEATER

Fire alarm control units with IDNAC SLC outputs provide individual address and control of TrueAlert and TrueAlert ES addressable notification appliances. When an IDNAC SLC reaches the current limit or the distance limit of the source IDNAC SLC, use of 4009 IDNAC Repeaters extends the IDNAC SLC with an additional 3 A of SLC current and up to 139 unit loads of additional supervisory capacity

INTERFACE TO VESDA AIR ASPIRATION DETECTORS

for 4100ES/4010ES Series Fire Alarm Control Units

Allows addressable fire detection units to gather and process status information from VESDA high-sensitivity air aspiration smoke detection systems. Hardware requirements include an Intelligent Interface Module installed in the fire alarm control unit, and an HLI Module and associated VESDA equipment installed in a separate enclosure.

Datasheet: AC4100-0026

4010ES FIRE CONTROL UNITS (CONVENTIONAL), NORTH AMERICA

4010ES Series Fire Detection and Control Units provide leading-edge installation, operator, and service features for customer applications in the mid-range addressable fire alarm systems market. An onboard ethernet port provides fast external system communications to expedite installation and service activity. Dedicated compact flash memory archiving provides secure on-site system information storage of electronic job configuration files. A variety of functional modules are available to meet specific system requirements. Selections allow control units to be configured for either standalone or networked fire control operation.

Datasheet: AC4010-0004
NOTE: Every 4010ES panel may not be available in each sales region. Refer to ordering tool for availability.

4007ES CONTROL UNITS

4007ES Hybrid Panel Front View

4007ES Hybrid, Fire Detection and Control Unit with Addressable and/or Conventional Initiation

4007ES Series Fire Detection and Control Units provide extensive installation, operator, and service features with point and module capacities suitable for a wide range of system applications. The Control Units can be configured for standalone or networked fire control operation. The convenient and intuitive color touchscreen provides easy access for typical system response actions and for detailed system review or configuration updates with password control to limit user access. Flexible for new and retrofit applications. Standard conventional IDCs and addressable IDNet+ communications provide flexibility for both new and retrofit systems. IDC and NAC end-of-line resistor values are selectable to match a wide range of existing initiating device circuits and notification appliance circuits.

4007ES FIRE CONTROL UNITS

For smaller facilities seeking advanced capabilities, the addressable, fully networkable 4007ES delivers with a compact, cost-effective package. It features multi-hazard suppression release and an intuitive color touchscreen display. Since it is UL cross-listed with most conventional panels, it can replace a conventional unit with minimal cost and disruption.

FAST, ACCURATE HAZARD DETECTION FOR EVERY SPACE AND FACILITY

The broad family of Autocall sensors and initiating devices are engineered to quickly and accurately identify hazards, from fire to carbon monoxide.

Autocall detection products are designed so you can select the right technology for each space within a facility. With Autocall, you can get fast isolation of problems and more targeted, accurate responses. Autocall sensors are UL268 7th edition listed to meet the latest standards and help you to stay fully compliant.

THE FAR-REACHING BENEFITS OF ADDRESSABILITY

The Autocall product line includes both conventional and addressable detection solutions to suit almost any facility and environment. In most cases, addressable products are the preferred solution, delivering extra value and configurability.

Addressability in a detection product means that each device is an independent, intelligent supervised and programmable. This enables fire detection systems to immediately identify the location of an alarm or trouble and help you launch a prompt and effective response.

Unlike conventional devices, Autocall addressable detection products are supervised to help ensure reliability and make problem isolation and remediation easier. These capabilities reduce the time and effort required to manage and maintain the system.

The background is a solid red color. A diagonal stripe of a slightly lighter shade of red runs from the top-left corner towards the bottom-right corner, creating a sense of movement or a path.

INITIATING DEVICES

THE SHORTEST DISTANCE FROM
DANGER TO THE RIGHT RESPONSE

DETECTION THAT SPANS ALL ENVIRONMENTS

Autocall detection products are part of a complete family of solutions, including control panels, notification appliances and speakers, that excel at sensing fires, alerting building occupants and guiding evacuation.

ADVANCED FEATURES THAT OFFER MORE

In addition to addressability, many Autocall detection products include helpful features that improve both performance and manageability. These include:

PEAK VALUE LOGGING

This feature provides a historical accounting of sensor data that you can review and use to set your system for maximum protection without triggering nuisance alarms. The data is logged and stored within the fire detection control unit.

PROGRAMMABLE SENSOR OPERATIONS

Individual sensors can be programmed to update their operation mode and turn specific functions on and off and change sensitivity at certain times of the day.

PHOTO SENSORS

These include drift **compensation** to help account for contamination and help reduce nuisance alarms; **automatic sensor cleaning indication**, providing multiple levels of advance warning that cleaning or replacement is needed; and **multiple UL-approved sensitivity** levels, for optimum protection.

Additionally, the address for each Autocall sensor is located in the base of the unit. That means that you can easily interchange heads without reprogramming, enabling you to remove them for service and reinstall them anywhere. This also eliminates the risk of putting the wrong sensor in the wrong base after maintenance and causing fire and trouble locations to be misreported.

TRUE ADDRESSABILITY

Quick detection, identification and
remediation.

TRUEALARM ADDRESSABLE ANALOG SMOKE AND HEAT SENSING DEVICES

A4098-9714 TrueAlarm Photoelectric Sensor Mounted in Base

TrueAlarm Analog Sensors and Bases

TrueAlarm analog sensors provide an analog measurement digitally communicated to the host control unit using addressable communications. At the control unit, the data is analyzed and an average value is determined and stored. An alarm or other abnormal condition is determined by comparing the sensor’s present value against its average value and time.

In-Duct Sensor Housing

HVAC air ducts in buildings supply fresh air and exhaust stale air. Depending on the overall fire detection requirements, smoke detection may be required in the air ducts. For applications where sampling tube type duct detection is not appropriate because of low air velocity or small duct size, Autocall model A4098-9750 and A4098-9751 housings can be used to install the Autocall model A4098-9714 TrueAlarm analog sensor directly in the duct.

IDNET/MAPNET II ADDRESSABLE INPUT/OUTPUT DEVICES

Relay Individual Addressable Module (IAM) with T-Sense Input

The Relay IAM with T-Sense allows a compatible fire alarm control unit IDNet communication channel to monitor two input contact closures with one point and control an output relay with the other point, both from a compact module requiring a single address.

Datasheet: AC4090-0007

A4090-9118 Relay IAM with T-Sense Input

PRODUCT	PART NUMBER	DESCRIPTION
Relay IAM	A4090-9118	Relay IAM with T-Sense
Adapter and Trim Plates	A4090-9813	Adapter plate to fit 4 11/16" (119 mm) square electrical box
	A4090-9801	Optional Trim Plate, For semi-flush mounted box
	A4090-9802	Optional Trim Plate, For surface mounted box

IDNET/MAPNET II ADDRESSABLE INPUT/OUTPUT DEVICES

Six Point Module

The Six Point Module allows a compatible fire alarm control unit IDNet communications channel to monitor four T-sense input circuits and control two output relays from a single compact module requiring a single address. Power is supplied by a 24 VDC connection to a listed fire alarm power supply.

Datasheet: AC4090-0009

A4090-9120 Six Point Module

PRODUCT	PART NUMBER	DESCRIPTION
Six Point Module	A4090-9120	Six Point Module
Trim Plates	A4090-9801	Optional Trim Plate, For semi-flush mounted box
	A4090-9802	Optional Trim Plate, For surface mounted box
End-of-Line Resistor Harnesses	A4081-9004	6.8 kΩ, 1/2 W ; Standard end-of-line resistor harness for N.O. contact supervision
	4081-9003	4.7 kΩ, 1/2 W
	A4081-9005	1.8 kΩ, 1/2 W

Signal Individual Addressable Module (IAM)

For applications requiring additional individual NAC supervision and control, the Signal IAM provides a 0.5 A remote NAC under host panel addressable point control. IDNet communications monitor the Signal IAM status and then connects the output NAC to the separate signal input for local alarm notification.

Datasheet: AC4090-0010

IDNET/MAPNET II ADDRESSABLE INPUT/OUTPUT DEVICES

8 A Relay Individual Addressable Module (IAM)

8 A Relay IAMs allow fire alarm control units to control a remotely located NO and NC contact using IDNet addressable communications for both data and module power.

Datasheet: AC4090-0015

A4090-9010 8 A IDNet Relay IAM Package

PRODUCT	PART NUMBER	DESCRIPTION
Relay IAM	A4090-9010	8 A Relay IAM
Adapter and Trim Plates	A4090-9813	Adapter plate to fit 4 11/16" (119 mm) square electrical box
	A4090-9801	Optional Trim Plate, For semi-flush mounted box
	A4090-9802	Optional Trim Plate, For surface mounted box

Individual Addressable Modules (IAMs)

Individual Addressable Modules (IAMs) receive both power and communications from a two-wire MAPNET II or IDNet circuit. They provide location-specific addressability to a single initiating device (such as single station smoke detector alarm contacts or heat detector contacts) or multiple devices at the same location by monitoring normally open dry contacts and the wiring to an end-of-line resistor.

Datasheet: AC4090-0001

A4090-9001 Supervised IAM

IDNET/MAPNET II ADDRESSABLE INPUT/OUTPUT DEVICES

Zone Adapter Modules (ZAM)

ZAMs allow a single addressable point to monitor a conventional initiating device circuit (IDC) populated with two-wire or four-wire initiating devices.

Datasheet: AC4090-0003

A4090 Series ZAM

PRODUCT	PART NUMBER	DESCRIPTION
Adapter Module	A4090-9101	Zone Adapter Module for Class B monitoring of 2-wire or 4-wire initiating devices
	A4090-9106	Zone Adapter Module for Class A monitoring of 2-wire initiating devices

PHOTOELECTRIC SMOKE DETECTORS, BEAM AND DUCT DETECTORS

A4098-9601 TrueAlarm Photoelectric Detector mounted in Base

TrueAlarm Photoelectric Smoke Detectors for Two-Wire and Four-Wire Bases

TrueAlarm photoelectric detectors provide many of the proven TrueAlarm analog sensing features for applications where detectors are connected to conventional two-wire or four-wire initiating device circuits (IDCs). Each TrueAlarm detector has an on-board microprocessor that evaluates its photoelectric light scattering chamber activity and makes an intelligent decision based on light obscuration history as to whether an alarm condition is present.

Datasheet: AC4098-0015

PRODUCT	PART NUMBER	DESCRIPTION
Smoke Detectors	A4098-9601	TrueAlarm Photoelectric Detector, 2.8%/ft (standard)
	A4098-9605	TrueAlarm Photoelectric Detector, 3.5%/ft (special application sensitivity, not ULC listed)
Compatible Bases	A4098-9788	2-Wire Base with connections for Remote Alarm LED Indicator
	A4098-9682	4-Wire Base with Auxiliary Alarm Relay Contacts and connections for Remote LED Alarm Indicator
	A4098-9683	2-Wire Base with Auxiliary Alarm Relay and connections for Remote LED Indicator

PHOTOELECTRIC SMOKE DETECTORS, BEAM AND DUCT DETECTORS

A4098-9602 TrueSense Detector
mounted in Base

TrueAlarm Photoelectric Smoke Detectors
with TrueSense Smoke/Heat Detection

These detectors combine photoelectric smoke detection technology and quick-response thermistor-based heat detection technology into a sophisticated, intelligent detector that analyzes each of these activities and their combination to determine whether alarm conditions are present.

Datasheet: AC4098-0017

PRODUCT	PART NUMBER	DESCRIPTION
Smoke Detectors	A4098-9602	TrueAlarm photoelectric detector with TrueSense photoelectric/thermal detection

PHOTOELECTRIC SMOKE DETECTORS, BEAM AND DUCT DETECTORS

Fireray 5000 Reflective Beam Detector
Head and Control Station

Reflective Beam Smoke Detectors

The Fireray 5000 System is an auto-aligning infrared beam smoke detector. Once the detector head is installed using the easyfit mounting system, an integral LASER can be activated that is aligned along the optical path of the infrared beam, allowing the reflective prism to be located quickly and with confidence. The Auto-align beam alignment feature then allows the reflective prism to be located quickly and accurately.

Datasheet: AC4098-0042

PRODUCT	PART NUMBER	DESCRIPTION
Reflective Beam Smoke Detectors and accessories	5000-103	Fireray 5000 Reflective Auto Align Beam Smoke Detector System
	5000-031	Additional Detector Head and Prism, select up to one additional head per 5000-103 System
	5000-011	5000 Series Detector Uni-Box back box
	5000-012	Detector Cover Plate for mounting 5000 Series Detector to a double gang electrical box, surface or flush mount
	5000-005	Alignment Bracket for detector or prism, surface mount; pivots horizontally or vertically for accurate alignment
	5000-201	Alignment Bracket for detector or prism, surface mount; provides 360° rotation plus 130° adjustment for accurate alignment, order detector and prism parts separately
	5000-009	Controller Back Box, surface or flush mount
	5000-010	Controller Back Box Semi-Flush Mount Trim Plate (for 5000-009 box)
	5000-006	Prism Wall Mount Bracket
	5000-008	Single Prism Alignment Adapter
	5000-007	Four Prism Alignment Adapter
	23901.01	Replacement Prism
	5000-004	Long Range Prism Kit; provides three, 23901 Prisms for distances between 160 ft and 330 ft (50 m to 100 m)
	5000-014	Ceiling Pendant Mounting Bracket
	1000-018	Protective Wire Cage for 5000 Series Detector Heads
	1000-019	Protective Wire Cage for 5000 Series Controllers

PHOTOELECTRIC SMOKE DETECTORS, BEAM AND DUCT DETECTORS

FIRERAY 3000 Controller shown with a Single Transmitter/Receiver Pair

End-to-End Infrared Optical Beam Smoke Detector

The FIRERAY 3000 End-to-End infrared Optical Beam Smoke Detector (OBSD) uses the latest optical technology, incorporating modern industrial, electronic and software techniques. This detector offers cost effective protection of large, open area spaces with high ceilings. It is also very well suited to applications where access to ceiling-mounted smoke detectors presents practical difficulties.

Duct Detector Housing, Front and Bottom View

Duct Detector Housings with TrueAlarm Photoelectric Detector for Two-Wire or Four-Wire Operation

Air duct smoke detector housings provide a TrueAlarm smoke detector for monitoring air conditioning or ventilating ducts. Sampling tubes are installed into the duct allowing air to be directed to the smoke detector mounted in the housing. These duct detector housings with smoke detectors are compatible with fire alarm control units that provide conventional two-wire or four-wire initiating device circuits (IDCs).

Datasheet: AC4098-0029

PRODUCT	PART NUMBER	DESCRIPTION
Duct Smoke Detector Housing with Photoelectric Detector	A4098-9685	2-Wire Duct Detector, standard operation
	A4098-9688	2-Wire Duct Detector with supervised single remote relay output
	A4098-9686	4-Wire Duct Detector with supervised multiple remote relay output

	A4098-9834	Test Station with keyswitch and red LED alarm indicator
	A4098-9835	Test Station with keyswitch, red LED alarm indicator, and green power-on LED
Epoxy Encapsulated Remote Relays and End-of-Line Resistor	A4098-9841	Relay, dual Form C (1/2 A @ 120 VAC)
	4098-9843	Relay, single Form C (7 A @ 120 VAC)
	A4081-9008	End-of-Line Resistor Harness

PHOTOELECTRIC SMOKE DETECTORS, BEAM AND DUCT DETECTORS

Duct Detector Housings with TrueAlarm Photoelectric Detector for Standalone Operation

The standalone duct detector housings with smoke detector are for applications that operate independent of a fire alarm control unit. They provide a TrueAlarm smoke detector for monitoring air conditioning or ventilating ducts. Sampling tubes are installed into the duct allowing air to be directed to the smoke detector mounted in the housing.

Datasheet: AC4098-0031

In-Duct Housing with A4098-9714 Sensor

PRODUCT	PART NUMBER	DESCRIPTION
Duct Detector	A4098-9687	Stand-alone operation duct detector with internal output relay, input power is 120 VAC, 24 VAC, or 24 VDC
Control Station	A4098-9842	Control Station with power-on green LED, red alarm LED, tone-alert, silence switch and key switch for test/reset, on stainless steel plate

HEAT DETECTORS

Electronic Heat Detectors for Two-Wire Direct Connect

These electronic heat detectors use a fast response, thermistor based design to provide temperature sensing that quickly, accurately, and consistently identifies when fixed temperatures are exceeded. The fixed temperature sensing thermistor readily tracks the local ambient temperature.

Datasheet: AC4098-0007

Electronic Direct Connect Heat Detector

PRODUCT	PART NUMBER	DESCRIPTION
Heat Detectors	A4098-9401	Fixed temperature, 135° F (57° C)
	A4098-9402	Fixed with rate-of-rise, 135° F (57° C)

	A4098-9404	Fixed with rate-of-rise, 200° F (93° C)

HEAT DETECTORS

Electronic Heat Detector mounted in Base

Electronic Heat Detectors for Two-Wire and Four-Wire Bases

These electronic heat detectors use a fast response, thermistor-based design to provide temperature sensing that quickly, accurately, and consistently identifies when fixed temperatures are exceeded. The fixed temperature sensing thermistor readily tracks the local ambient temperature. This eliminates the time required to melt a lead pellet or heat a bimetallic element as occurs in mechanical heat detector designs and provides the required heat detection for most applications.

Datasheet: AC4098-0014

PRODUCT	PART NUMBER	DESCRIPTION
Heat Detectors	A4098-9612	Fixed Temperature Operation at 135° F (57° C)
	A4098-9614	Fixed Temperature Operation at 200° F (93° C)

NON-CODED MANUAL STATIONS

Electronic Heat Detector mounted in Base

Non-Coded, Non-Addressable Manual Stations

Activation of the single action manual stations requires a firm downward pull to activate the alarm switch. Completing the action breaks an internal plastic break-rod (visible below the pull lever, use is optional). The use of a break-rod can be a deterrent to vandalism without interfering with the minimum pull requirements needed for easy activation. The pull lever latches into the alarm position and remains extended out of the housing to provide a visible indication.

MX TECHNOLOGY ADDRESSABLE DEVICES

MX Technology Individual Addressable Modules (IAMs)

These MX Technology addressable I/O (input/output) modules provide flexible monitoring and control to satisfy a variety of applications. Each is individually addressable and communicates with an MX Loop Module located in the host fire alarm control panel.

Datasheet: AC4090-0012

PRODUCT	PART NUMBER	DESCRIPTION
Addressable Input/Output Modules	A4090-5201	Mini-IAM, supervised contact monitoring module
	A4090-5202	Dual Input IAM, dual Class B or single Class A supervised contact monitoring module
	A4090-5203	Relay IAM, contact rated 2 A @ 24 VDC
	A4090-5204	Signal IAM, two Class B NACs, or one Class A NAC, rated 2 A @ 24 VDC, up to 62 appliances
	A4090-5205	Monitor ZAM, two Class B inputs or one Class A input
	A4090-5206	Line Isolator Module
Accessories	A4081-9022	27 kΩ, 1%, ½ W resistor
	A2098-9808	Remote LED on single gang stainless steel plate, optional for use with A4090-5201 Mini-IAM
	517.035.007	Replacement Module Front Cover

MX TECHNOLOGY ADDRESSABLE DEVICES

MX Technology Multiple I/O Modules

Multiple I/O Modules use MX Technology to provide an addressable input/output module with flexible monitoring of three inputs and control of two outputs to satisfy a variety of applications.

Datasheet: AC4090-0016

PRODUCT	PART NUMBER	DESCRIPTION
Module and Housing	A4090-5250	Multiple I/O Module, 3 Class B inputs and 2 Form C relay outputs
	557.201.401	D800 Ancillary housing; IP55 rated; provides viewing port for status LED
	557.201.303	DIN-Rail Mounting Kit (not UL listed)

MX TECHNOLOGY ADDRESSABLE DEVICES

A4098-5254 Triple Sensor

850 Series Multi-Sensors

MX compatible 850-Series sensors provide robust and reliable construction that has undergone stringent environmental testing. Electrical contacts are molded into the plastic to eliminate movement. Construction uses durable, fire-resistant FR110 plastic. MX Sensors communicate to the MX Loop Module using MX Technology communications. Each detector can operate in one or two of several detection modes, ensuring that it is easily optimized to the risk.

RELIABLE GUIDANCE WHEN IT'S NEEDED MOST

When fire strikes, your priority is to alert people to the danger and guide them to safety. You can't risk wasted time or unclear direction. Autocall notification appliances and speakers give you the efficiency and clarity you need in these high-stakes situations. Engineered for exceptional performance and reliability, Autocall notification products help to ensure orderly evacuations and protect lives.

GREATER CHOICE AND GREATER INTELLIGENCE

Every facility is unique. To optimize the design, configuration, cost and maintainability of your fire detection system, you need access to the broadest range of notification products. Autocall fulfills that need with offerings from conventional notification appliances to state-of-the-art addressable products that deliver the ultimate in reliability, flexibility and ease of maintenance.

NOTIFICATION APPLIANCES

SMART WAYS TO ALERT AND GUIDE
PEOPLE IN AN EMERGENCY

NOTIFICATION THAT HELPS SAVE LIVES

Autocall notification products are part of a complete family of solutions, including control panels, detection products and speakers, that excel at sensing fires accurately, alerting building occupants and guiding evacuation.

For illustrative purposes only. Does not depict actual system configuration.

THOUGHTFUL FEATURES THAT DELIVER MORE

Easier, more efficient design and installation. With the ability to T-tap and install more appliances per run, TrueAlert ES appliances can be less costly to install. The functionality of each TrueAlert ES appliance can be individually programmed, so installers can fine-tune each system to the unique needs of each space in a facility – and easily update it as needs change.

SELF-TESTING CAPABILITY

With TrueAlert ES, building owners and managers can test all of their notification appliances in seconds. They can test when and how it's most convenient for them, and they can reduce disruption and eliminate costly, after-hours manual testing.

APPLICATION VERSATILITY

TrueAlert ES notification products are suited to handle virtually any application. They include multi-tone appliances that meet NFPA 72 requirements for low-frequency notification in certain environments.

COMPACT DESIGN AND GREATER ENERGY EFFICIENCY

Thanks to LED technology, TrueAlert ES 5900 series appliances are smaller, more energy efficient, and less obtrusive than others.

MEET PULSE WIDTH REQUIREMENTS

Autocall TrueAlert ES 5900 Series appliances are the first LED appliances in the industry to meet NFPA 72 2016 edition notification appliance pulse width requirements. LEDs and strobes can be mixed on the same network.

TrueAlert ES addressable chimes are individually addressed audible notification appliances that receive power, supervision, and control signals from a fire alarm control panel providing IDNAC Signaling Line Circuits (SLCs).

Datasheet: AC49CHO-0001

PRODUCT	PART NUMBER	DESCRIPTION
Appliance Only	A49CHO-APPLW	TrueAlert ES Addressable Chime Appliance Electronics, Wall-Mount (order mounting plate and cover separately)
Cover	A49AOC-WRFIRE	Cover, Red, "FIRE"
	A49AOC-WRS	Cover, Red, Logo Only
	A49AOC-WWFIRE	Cover, White, "FIRE"
	A49AOC-WWS	Cover, White, Logo Only
Mounting Plate	A49MP-AVVOWR	Mounting plate, Red
	A49MP-AVVOWW	Mounting plate, White
Accessory	2975-9145	Mounting Box, Red (requires 4905-9931 Adapter Plate)
	A4905-9931	Adapter Plate, Red for mounting to Autocall 2975-9145 Box (typically for retrofit, mount vertical or horizontal)
	A4905-9937	Adapter Skirt, Surface-Mount, Red
	A4905-9940	Adapter Skirt, Surface-Mount, White
	4905-9961	Wire guard, Red with mounting plate, compatible with semi-flush mounting or surface mount boxes

TRUEALERT ADDRESSABLE STROBES

WALL MOUNTED

Addressable Dual-Strobe

Multi-Candela TrueAlert addressable combination strobes are individually addressed and individually controlled with power, supervision, and control supplied from a fire alarm control panel providing IDNAC Signaling Line Circuits (SLCs). A single assembly provides an amber lens strobe for non-fire alarm, alert notification for use with Emergency Communications Systems, and a clear lens strobe for fire alarm notification.

Datasheet: AC4906-0009

PRODUCT	PART NUMBER	DESCRIPTION
Appliance (Complete)	A4906-9208	TrueAlert Multi-Candela Dual-Strobe, Wall-Mount, 15/30/75/110cd, Top Strobe: Amber Lens, "ALERT", Lower Strobe: Clear Lens, "FIRE", Red
	A4906-9211	TrueAlert Multi-Candela Dual-Strobe, Wall-Mount, 15/30/75/110cd, Top Strobe: Amber Lens, "ALERT", Lower Strobe: Clear Lens, "FIRE", White
Accessory	A4905-9837	Adapter Skirt, Surface-Mount, Red
	A4905-9847	Adapter Skirt, Surface-Mount, White

TRUEALERT ADDRESSABLE STROBES

CEILING MOUNTED

Multi-Candela Addressable Strobe

Multi-Candela TrueAlert Addressable Strobes provide convenient installation to standard electrical boxes. The strobe is individually addressed and individually controlled with power, supervision, and control supplied from a fire alarm control panel providing IDNAC Signaling Line Circuits (SLCs).

Datasheet: AC4906-0004

PRODUCT	PART NUMBER	DESCRIPTION
Appliance (Complete)	A4906-9202	TrueAlert Multi-Candela Addressable Strobe, Ceiling-Mount, 15/30/75/110cd, Red, "FIRE"
	A4906-9204	TrueAlert Multi-Candela Addressable Strobe, Ceiling-Mount, 15/30/75/110cd, White, "FIRE"
Accessory	4905-9910	Adapter Plate for mounting to Wiremold Box or handy electrical box (typically surface applications)

TRUEALERT ADDRESSABLE STROBES

CEILING MOUNTED

Multi-Candela Addressable Horn/Strobe

Multi-Candela TrueAlert addressable horn/strobes provide convenient installation to standard electrical boxes. Operation is individually addressed and individually controlled with power, supervision, and control supplied from a fire alarm control panel providing IDNAC Signaling Line Circuits (SLCs).

Datasheet: AC4906-0005

PRODUCT	PART NUMBER	DESCRIPTION
Appliance (Complete)	A4906-9228	TrueAlert Multi-Candela Horn/Strobe, Ceiling-Mount, 15/30/75/110cd, Red, "FIRE"
	A4906-9230	TrueAlert Multi-Candela Horn/Strobe, Ceiling-Mount, 15/30/75/110cd, White, "FIRE"
Accessory	A4905-9915	Adapter Skirt, White for mounting to 1 1/2 inch deep electrical box
	A4905-9916	Adapter Skirt, Red for mounting to 1 1/2 inch deep electrical box
	4905-9927	Wire Guard, Red, Semi-Flush Mounting (requires 4905-9928 mounting plate for 4905-9923, -9924, and -9145 boxes)

TRUEALERT NON-ADDRESSABLE SPEAKER/ADDRESSABLE STROBES

WALL MOUNTED

Non-Addressable Speaker/Addressable Strobe

The multi-candela TrueAlert Non-addressable Speaker/Addressable Strobe provides convenient installation to standard electrical boxes with extensions. The strobe is individually addressed and individually controlled with power, supervision and control supplied from fire alarm control units providing IDNAC Signaling Line Circuits (SLCs).

Datasheet: AC4906-0006

PRODUCT	PART NUMBER	DESCRIPTION
Appliance (Complete)	A4906-9251	TrueAlert Addressable Multi-Candela Speaker/Strobe, Wall-Mount, 15/30/75/110cd, 25/70.7V, 1/4, 1/2, 1, 2watts, White, "FIRE", UL, ULC, FM

	A4906-9257	TrueAlert Addressable Multi-Candela Speaker/Strobe, Ceiling-Mount, 15/30/75/110cd, 1/4, 1/2, 1, 2watts, Red, "FIRE", ULC
Accessory	2905-9946	Tile Bridge, Suspended Ceiling 2ft by 4ft tile size installation

TRUEALERT ADDRESSABLE MODULES

Addressable Isolator+Module

Isolator + modules provide short circuit isolation for TrueAlert addressable notification appliance wiring.

Datasheet: AC4905-0001

PRODUCT	PART NUMBER	DESCRIPTION
Module	A4905-9929	TrueAlert Addressable Isolator+ Module, mounts in 4" (102mm) square, 2-1/8" (54mm) minimum depth electrical box

TRUEALERT ADDRESSABLE MODULES

Addressable Adapter Module

Converts a single TrueAlert addressable notification address into separate 24 VDC audible and visible notification outputs.

Datasheet: AC4905-0004

PRODUCT	PART NUMBER	DESCRIPTION
Module	A4905-9816	TrueAlert Addressable Adapter Module, mounts in 4-11/16" (119mm) square, 2" (51mm) minimum depth electrical box, requires surface or flush mount cover plate
	A4081-9008	End-of-Line Resistor Harness (ref. 733-894); 10 kΩ, ½ W; two required, one each for audible and visible output
Accessory	A4905-9817	Cover Plate, Surface Mount, Beige
	A4905-9818	Cover Plate, Flush Mount, Beige

TRUEALERT NON-ADDRESSABLE HORNS, STROBES AND HORN/STROBES

WALL MOUNTED

Non-Addressable Horn

TrueAlert Non-Addressable Horn model A4901-9820 is an audible notification appliance with a loud and penetrating, harmonically rich sound that can be controlled either directly from a standard NAC (free-run operation mode) or by SmartSync two-wire operation mode.

Datasheet: AC4901-0010

PRODUCT	PART NUMBER	DESCRIPTION
Appliance (Complete)	A4901-9820	TrueAlert Non-Addressable Horn, Free-Run/SmartSync, Red, Logo Only
Cover	A4905-9988	Cover, Red, "FIRE" (for replacement if required)
	A4905-9989	Cover, White, "FIRE" (for replacement if required)
Accessory	2975-9145	Mounting Box, Red (requires 4905-9931 Adapter Plate)
	A4905-9931	Adapter Plate, Red for mounting to Simplex 2975-9145 Box (typically for retrofit, mount vertical or horizontal)
	A4905-9937	Adapter Skirt, Surface-Mount, Red
	A4905-9938	SmartSync Control Module
	A4905-9940	Adapter Skirt, Surface-Mount, White
	A4905-9838	"Optional Sound Damper; package of 20 field installed adhesive backed horn output attenuator"

TRUEALERT NON-ADDRESSABLE HORNS, STROBES AND HORN/STROBES

WALL MOUNTED

Non-Addressable Mini-Horn

Mini-horns provide a loud and penetrating notification sound controlled by SmartSync two-wire operation. The compact package allows mounting in a variety of convenient locations. An output level switch allows selection of low or high sound output as required for the location.

Datasheet: AC4901-0013

PRODUCT	PART NUMBER	DESCRIPTION
Appliance (Complete)	A4901-9858	Non-Addressable Mini-Horn, SmartSYNC, Red, Blank
	A4901-9859	Non-Addressable Mini-Horn, SmartSYNC, White, Blank
Accessory	A4905-9938	SmartSync Control Module

TRUEALERT NON-ADDRESSABLE HORNS, STROBES AND HORN/STROBES

WALL MOUNTED

Multi-Candela, Non-Addressable Strobe

TrueAlert multi-candela high intensity appliances provide convenient installation to standard electrical boxes. They are both impact- and vandal-resistant and provide a convenient strobe intensity selection. Since each model can be selected for strobe intensity output, onsite model inventory is minimized and changes encountered during construction can be easily accommodated. Wall mount strobe housings are a one-piece assembly (including lens) that mounts to a single or double gang or 4" square standard electrical box.

	A4905-9993	White cover with red "FIRE" lettering
Accessory	2975-9145	Mounting Box, Red (requires 4905-9931 Adapter Plate)
	A4905-9914	Synchronized Flash Module (Class B), 2 amps
	A4905-9922	Synchronized Flash Module (Class A), 2 amps
	A4905-9931	Adapter Plate, Red for mounting to Autocall 2975-9145 Box (typically for retrofit, mount vertical or horizontal)
	A4905-9937	Adapter Skirt, Surface-Mount, Red
	A4905-9938	SmartSync Control Module
	A4905-9940	Adapter Skirt, Surface-Mount, White
	4905-9961	Wire guard, Red with mounting plate, compatible with semi-flush mounting or surface mount boxes

TRUEALERT NON-ADDRESSABLE HORNS, STROBES AND HORN/STROBES

WALL MOUNTED

Multi-Candela, Non-Addressable Horn/Strobe

TrueAlert multi-candela horn and synchronized strobe provide convenient installation to standard electrical boxes. The enclosure designs are both impact- and vandal-resistant and provide a convenient strobe intensity selection. Wall-mount strobe housings are a one-piece assembly (including lens) that mounts to a single or double gang or 4" square standard electrical box.

TRUEALERT NON-ADDRESSABLE HORNS, STROBES AND HORN/STROBES

CEILING MOUNTED

Non-Addressable Horn/Strobe

TrueAlert multi-candela horn and synchronized strobe provide convenient installation to standard electrical boxes. The enclosure designs are both impact- and vandal-resistant and provide a convenient strobe intensity selection. Since each model can be selected for strobe intensity output, on-site model inventory is minimized and changes encountered during construction can be easily accommodated.

BRINGING ORDER TO COMPLEX ENVIRONMENTS

Every facility presents unique opportunities and challenges for fire detection system design, installation and management. Hazards and occupancy use. Structural limitations. Multiple media types. These factors can complicate installation, limit choice, inhibit performance and add costs and management complexity – whether you're starting from scratch or expanding an existing structure.

You can overcome these limitations – and gain greater control over your fire detection system – with the help of Autocall networking and management products. They give you the ability to design without limitations, install without complication, and monitor and control multiple panels and buildings with ease. With Autocall, you don't have to compromise.

NETWORKS AND WORKSTATIONS

GREATER FLEXIBILITY AND CONTROL,
BETTER PROTECTION OF
LIVES AND PROPERTY

ADVANCED SOLUTIONS FOR ALL YOUR NEEDS

You can count on Autocall products to deliver innovation that makes a difference – right from the start. You can create more efficient, optimized designs, thanks to the Autocall ES Net network's scalability, resilience and capacity. With support for multiple network topologies, all major connection media types and even supplemental system traffic, installation is worry-free and cost-effective. And once your fire detection system is up and running, Autocall TrueSite Workstations deliver the decision-making information you need. Support for data rates up to 100MB per second gives you the performance necessary to respond swiftly and effectively to any condition.

AUTOCALL ES NET NETWORK

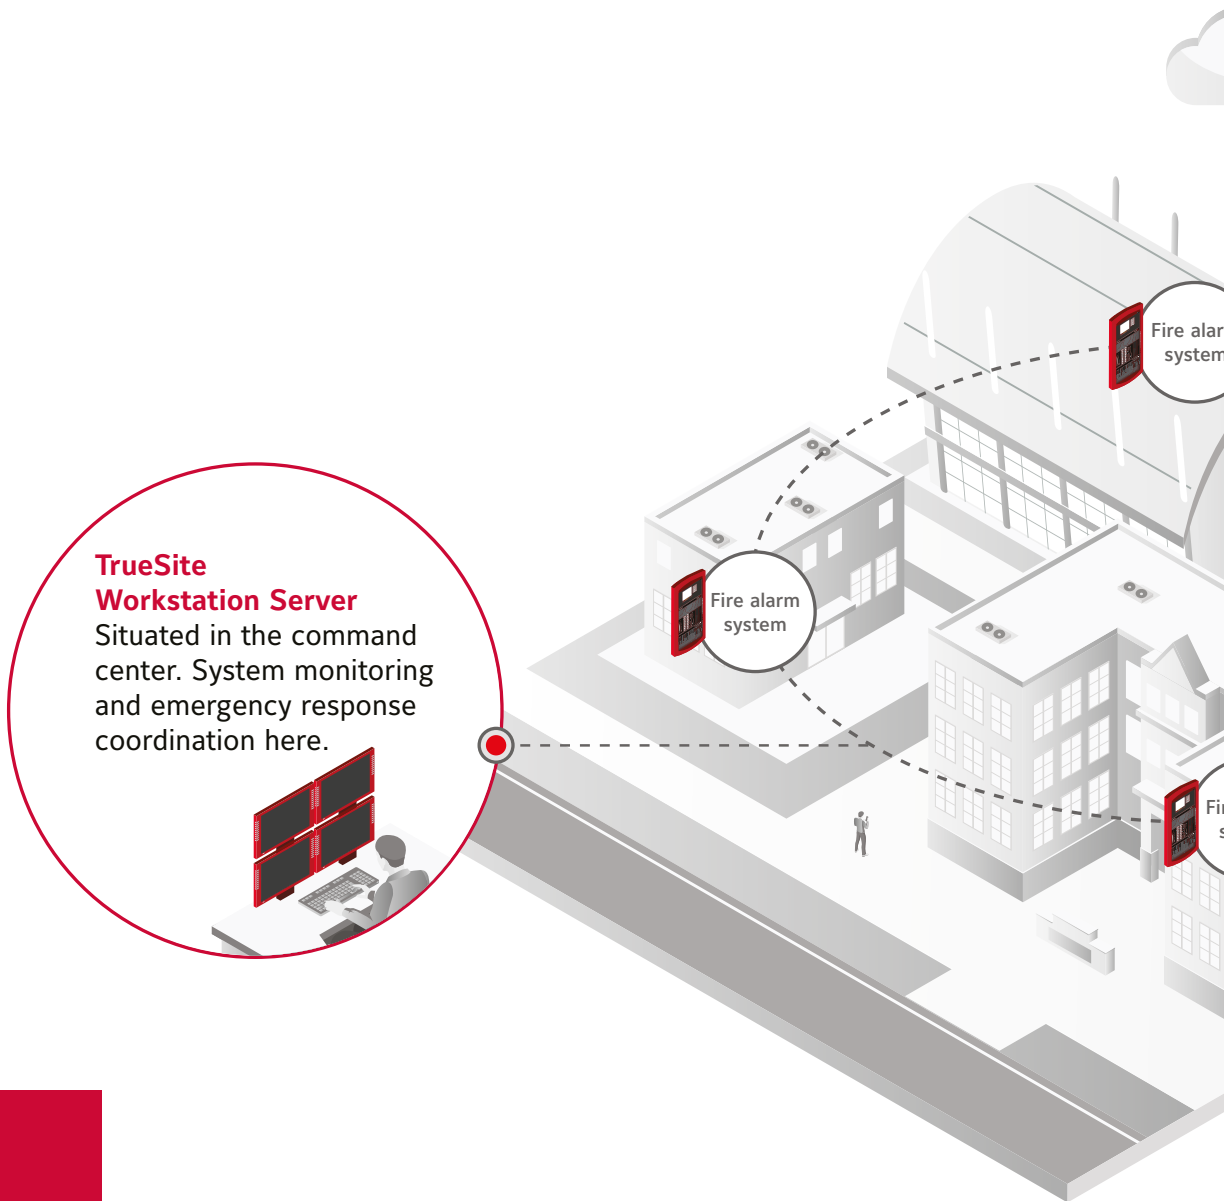

Optimized design. Installation flexibility. High-bandwidth connectivity. Survivability. The highly scalable, resilient, IP-based Autocall ES Net delivers these benefits and more while supporting a wider range of connection media, including ethernet, DSL, single-mode fiber and multi-mode fiber. In addition, ES Net supports ring, star, bus and bridged rings network topologies, enabling you to create fault-tolerant, highly survivable networks while mixing and matching media between nodes to optimize cost, distances and performance.

ES Net is a redundant system with battery backup, making it highly resilient to help ensure survivability. As an IP-based network with high bandwidth, it can also accommodate supplemental traffic, such as security cameras, access control and building automation systems. There's zero impact to fire detection system traffic because fire-related traffic is isolated and given top priority.

Ongoing management is easy with ES Net. As it offers centralized system management and higher bandwidth, you can perform upgrades more quickly to reduce downtime and operational expenses. When you're ready to expand your network, ES Net offers tremendous flexibility, allowing up to 82,000 feet (25 km) between nodes. Its high bandwidth, increased memory capacity and advanced diagnostics help ensure maximum uptime, consistent performance and a future without limitations.

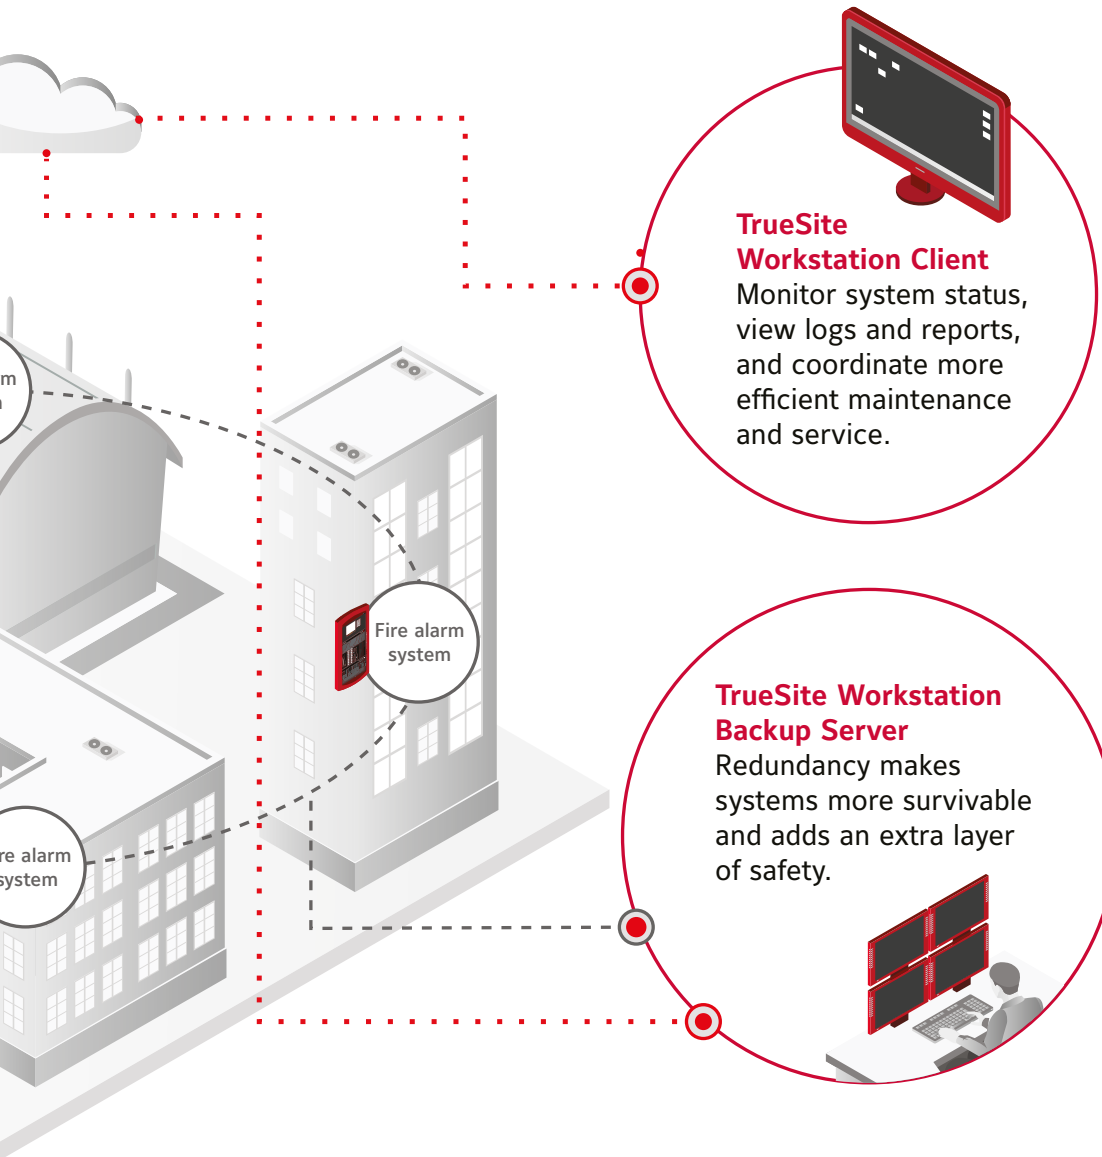

AUTOCALL TRUESITE WORKSTATION SERVER AND CLIENTS

ADVANCED FIRE ALARM MANAGEMENT
THAT'S ACCESSIBLE TO EVERYONE

IDEAL FOR:

- Colleges and universities
- Hospitals
- Large commercial facilities
- Transportation hubs
- Multi-building campuses

BUILDING SYSTEMS INFORMATION UNIT

EASIER MANAGEMENT. MORE INFORMATION.
BETTER INCIDENT RESPONSE.

Fire Alarm Control Unit

The heart of the fire alarm system, all equipment is connected to it, and it provides alerts when there is an emergency or maintenance is needed.

TrueSite Workstation BSIU

Graphical management consoles show all fire alarm system information and provide redundant control features in an easy-to-understand format, making it easier for operators to respond to emergencies and service alerts.

IDEAL FOR:

- School districts
- Clinics and nursing homes
- Small commercial facilities
- Single-building systems

TRUESITE WORKSTATION BUILDING SYSTEMS INFORMATION UNIT

- The TrueSite Workstation Building Systems Information Unit (BSIU) is designed for applications where you want the same intuitive operator interface and advanced annunciation and reporting features of the TrueSite Workstation but don't need all of its fire alarm system control capabilities.
- The BSIU can be run on commercially available computers – which are much more cost effective than UL864 listed machines – while still meeting all NFPA code requirements.
- The BSIU is a perfect fit for schools, medical office buildings, clinics, commercial properties, and other single building facilities.

TAKE THE NEXT STEP - PUT AUTOCALL PRODUCTS TO WORK FOR YOU TODAY.

As always, Autocall continues to advance state-of-the-art protection that helps make management easier and more cost effective.

Choose Autocall networking and workstation solutions – and experience greater freedom and command of your life safety network today and for years to come.

TrueSite Incident Commander

The TrueSite Incident Commander offers TrueSite Workstation operation in an all-in-one package providing a touchscreen computer, monitor, hard drive, and required input/output connections in single assembly. This allows installation within a 4100ES fire alarm control unit or remote annunciator with power supplied from the fire alarm power supply and secondary batteries. The all-in-one computer is also available for desktop applications (requires separate AC power).
