

Feature Quick Quote Takeoff Tool for Autocall with IDNAC/ NAC P2P Integration

IDNAC/ NAC P2P Designer & FQQ Tool Version 1-4-0 Enhancements

We are pleased to implement the following improvements and enhancements to the P2P/ FQQ tool. Voice of the customer feedback has played a key role in its further development.

- New NAC P2P designer for conventional appliances which support manufactured, max value and custom devices
- Added Control Buttons to NAC P2P
- Added Type Definitions to NAC P2P
- Increased the number of IDNAC user defined devices in IDNAC FQQ Sheet
- New Multi Tap device added to the IDNAC P2P and Circuit Drawing
- New highlight rows feature added to all FQQ Sheets and File Import
- New “Jump to” category feature with auto zoom added to all the FQQ Sheets and File Import
- Increased the number designation to 100 in all FQQ Sheets (IDNet, IDNAC, NAC and Third Party)
- New “Jump to Designation” feature added with auto zoom to all the FQQ Sheets
- Added a selection of conventional devices to the File Import

- Added Multi Tone and Chime devices to File Import
- Added Wall Mount Horns to File Import (Simplex is using the single assembly versions (A49AO-WRF and A49AO-WWF)
- Added Third Party items to BOM
- Updated the order of BOM (1. Panels, 2. Panel Ancillaries, 3. Initiating, 4. Addressable Notification, 5. Conventional Notification, 6. Custom Notification and 7. Third Party)

FQQ Takeoff Tool w/ IDNAC/ NAC P2P Designer can be downloaded at [Autocall.com](https://www.autocall.com)
